Spectrophotometer

Kapci Coatings has developed a new hand-held color matching tool called "Kapci Data color find"

Color Spectro:

With Kapci Data Color Find's spectrophotometer, searching for color becomes very easy. The color search function evaluates the electronically collected data and it outputs a precise color formula in a matter of seconds in a rank from better and goes down . It couldn't be simpler. Whatever the job – fender, side panel or total re-spray is, Kapci Data Color Find identifies the original paintwork fully automatically. For metallic there is solid color or pearlescent.

The success of a vehicle refinish depends first on color accuracy. Over 36,000 car manufacturer colors are in existence with a regular update .

How it works?

Finding colors with Kapci Data Color Find is straightforward. First it reads the color and then it automatically searches for the closest formula, even if a color code is not available. For very difficult colors Kapci Data color Find offers ranked formulas. It allows body shops to find the best color formula for any car on the worldwide .

Features:

Accurately measures color with one button press Full lab grade spectrophotometer provides full reflectance measurements with phenomenal optical resolution The Kapci Data color Find can be used with our complete line of color solutions, from paint color matching to quality control and formulation in a wide range of car refinish A quick calibration process and easy operation ensure perfect, reliable results in less time. With Spectro, you can easily find the best color formulas for any car.
