

# Femoral

## Interlocking System

### ● Femoral Nail Features

- Stainless steel 316 LVM.
- Can be used as a minimal invasive technique by cannulated instruments or by traditional technique.
- Universal use - left or right.
- Cannulated.
- Anatomical Nail.
- With Transverse proximal locking screws.
- With dynamic proximal hole.
- With accurate distal target device for distal screws.
- Self tapping locking screws.
- Complete instrument set with the newly designed instruments like
  - Cannulated awl
  - Smart reduction device ( Finger like)
  - Newly designed gripper to help the surgeon in manipulation with the guide wire
  - Mechanical Distal target device instrument set

**Reconstruction nail**

**Retrograde nail**

EgiFix medical provides several solutions for the femoral fixation with intramedullary nails that can meet the surgeons need according to the type of fracture and the patients' need

**Reconstruction nail**

with screws to catch the neck of the femur  
different entry port through the greater trochanter  
two bowing to meet the anatomical bowing of the femur

**Retrograde nail**

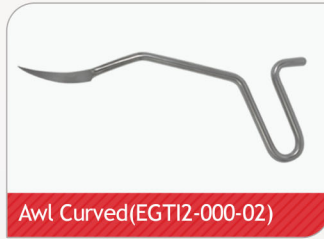

can be an advantage when used for distal femur fracture type A and C according to AO classification

**Femoral Interlocking Instrument Set**

Awl Cannulated(EGTI2-000-01)

Awl Curved(EGTI2-000-02)

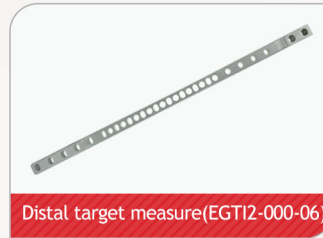

Gripper(EGTI2-000-03)

Flexible Reamers(EGTI2-000-04)

Proximal Assembly(EGTI2-000-05)

Distal target measure(EGTI2-000-06)

Distal target Device 1(EGTI2-000-07)

Stabilizing Rod 6.0mm(EGTI2-000-08)

Metal Ruler(EGTI2-000-09)

Drill Guide 4.0mm(EGTI2-000-10)  
Drill Guide 5.2mm(EGTI2-000-11)

Drill Bit 4.0mm(EGTI2-000-12)

Reamer 6.0mm(EGTI2-000-13)

Depth Gauge(EGTI2-000-14)

Reduction Device(EGTI2-000-15)

Sliding Hammer(EGTI2-000-16)

Extractor(EGTI2-000-17)

Angeled Trocar(EGTI2-000-18)

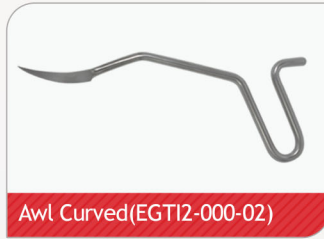

Screw Driver(EGTI2-000-19)  
Trocar 8.0mm(EGTI2-000-20)
