

Tube

We Care...

A Packaging Company

At Tube..

We are all united in our commitment to satisfy the needs of aluminum tubes and plastic packaging for pharmaceutical and cosmetic sectors. We strive to be the partner of choice for all our customers, through quality, service and innovation. We will be very pleased to have the opportunity to serve you!

About us

TUBE's roots date back to 1982 when it started as a dedicated supplier of collapsible aluminum tubes in Egypt, mainly serving the pharmaceutical and cosmetics sectors. In 2012, TUBE added another production facility to better serve the needs of its growing customers and to expand its exports markets.

Besides the large capacity that TUBE provides locally, regionally and to various export markets, TUBE cares about all its stakeholders... team members, customers, suppliers, and community: The engaging culture, empowered team, and cutting-edge technology are the distinctive elements of what TUBE is.

As environmentally responsible and ethically based company, TUBE is working with suppliers and customers to minimize process scrap & packaging waste among various other initiatives to maintain healthy balance between the responsibilities in our work, our homes and our community.

Your partner for aluminum tubes

We care about our customers... TUBE has all the necessary resources to be the most reliable and preferred partner for all of its customers. The highest quality standards, flexibility to accommodate customers' requirements, individual customer support, timely deliveries, close after sale service are, for us, the basis of successful cooperation and sincere partnership.

Respect, Positive attitude, Teamwork,

Why aluminum tubes?

Aluminum tube offers unique advantage for the packaging industry! It guarantees perfect security and preservation of the packed filling material since it is having complete impermeability to oxygen, moisture and all other external agents, thus, giving the longest shelf life to the product while maintaining its freshness and complete properties thanks to the proper internal lacquer covering the complete inner tube surface, and the latex ring sealing its bottom end. No suck-back while application, avoiding oxygen penetration inside the tube and leaving the tube shape with the actual amount of material inside to be visible for end user reference.

Not every good tube is suitable for every good filling material!

We care about our quality and the success of our customers... We always work with our customers as partners to build successful products by assisting them in the selection of the most suitable tube dimensions and specification for their very specific application in order to perfectly match their defined need.

Our experience in matching the suitable tube specification to the filling material properties is positioning TUBE's tubes to be the preferred choice of top pharmaceutical, cosmetic companies and producers of creams, gel, ointments, food, adhesives, sealants, paints, silicones, and much more.

The whole is more than the sum of its parts

We care about our technology... In a rapidly moving market, innovation is key to sustainable growth. We recognize that the external appearance of the product is playing an important role to capture customers' attention. From here, the need of having nice and vivid colors with eye-catching graphics is necessary to give the final product its added value: we can help! Our color management system and equipment are state-of-the-art, including high-speed fully automated lines up to 6 colors to ensure finest quality and features.

Quality is a built in process.
Consistency is a key word.

Quality is not just a good product produced once, twice, sometimes, or many times... We, at TUBE, believe that consistency of producing quality products is essential for our continuous and future growth.

E f f e c t i v e n e s s ,

Dimensions: Outer diameter (D) in mm	Approximate length (L) in mm		Approximate filling capacity	
	Minimum	Maximum	In grams	In ml
13.5	60	80	4 - 6.5	5.5 - 8.5
16	70	90	6 - 9	8 - 12
19	80	125	10 - 20	12.5 - 25
22	100	130	15 - 20	25 - 37
25	110	150	28 - 40	38 - 52
30	110	160	35 - 65	50 - 85
35	135	180	63 - 100	85 - 130

N.B. Above mentioned figures are only approximate & orientate, as it also depends on the exact physical properties of the filling material to determine the exact figures.

Product Range

Our products are manufactured out of %99.7 minimum pure aluminum, providing excellent protection for sensitive products. TUBE's tubes are made of the best raw materials and components.

We offer various tube diameters ranging from 13.5mm, 16mm, 19mm, 22mm, 25mm, 30mm, and 35mm...with various caps in M9 and M11 threads.

Quality

We care about the quality of our operations... For us at TUBE, quality is a key word expressing our main mission, which is to produce the Finest Collapsible Aluminum Tube! In order to provide the finest tube, TUBE's team is fully engaged on ensuring that quality is integrated in every aspect of our operations, namely our equipment, process controls, color systems, raw materials and services. Of equal importance, we are actively engaged and committed to ensure that quality is embedded in our culture and management systems.

TUBE is ensuring its quality level with continuous daily improvements through its management systems certified by TUV in accordance to ISO 9001:2000, ISO 14001:2004, and OHSAS 18001:2007. Additionally, TUBE is adhering to quality specifications in accordance to British, German and Egyptian standards. We too welcome customer specific specifications.

TUBE is equipped with a state of the art laboratory with equipment, tools and measuring devices enabling the continuous inspection to ensure that our products are matching our customers' requirements before releasing them to final dispatch.

At Tube... we are united in our passion to care and serve all our 'customers' for success!
