6 factories Operated through 4 complementing Companies ; SIPES Paints, PerBuild, Transocean and VEETA Polymers. under the umbrella of SIPES Group, can proudly produce all kind of paints and gives the total solution in the paints field for any kind of paints and chemicals needed:

- Decorative Paints
- Protective Coatings
- Marine Coatings
- Wood Paint Systems
- Car Auto refinishes
- Polymers

SIPES GROUP

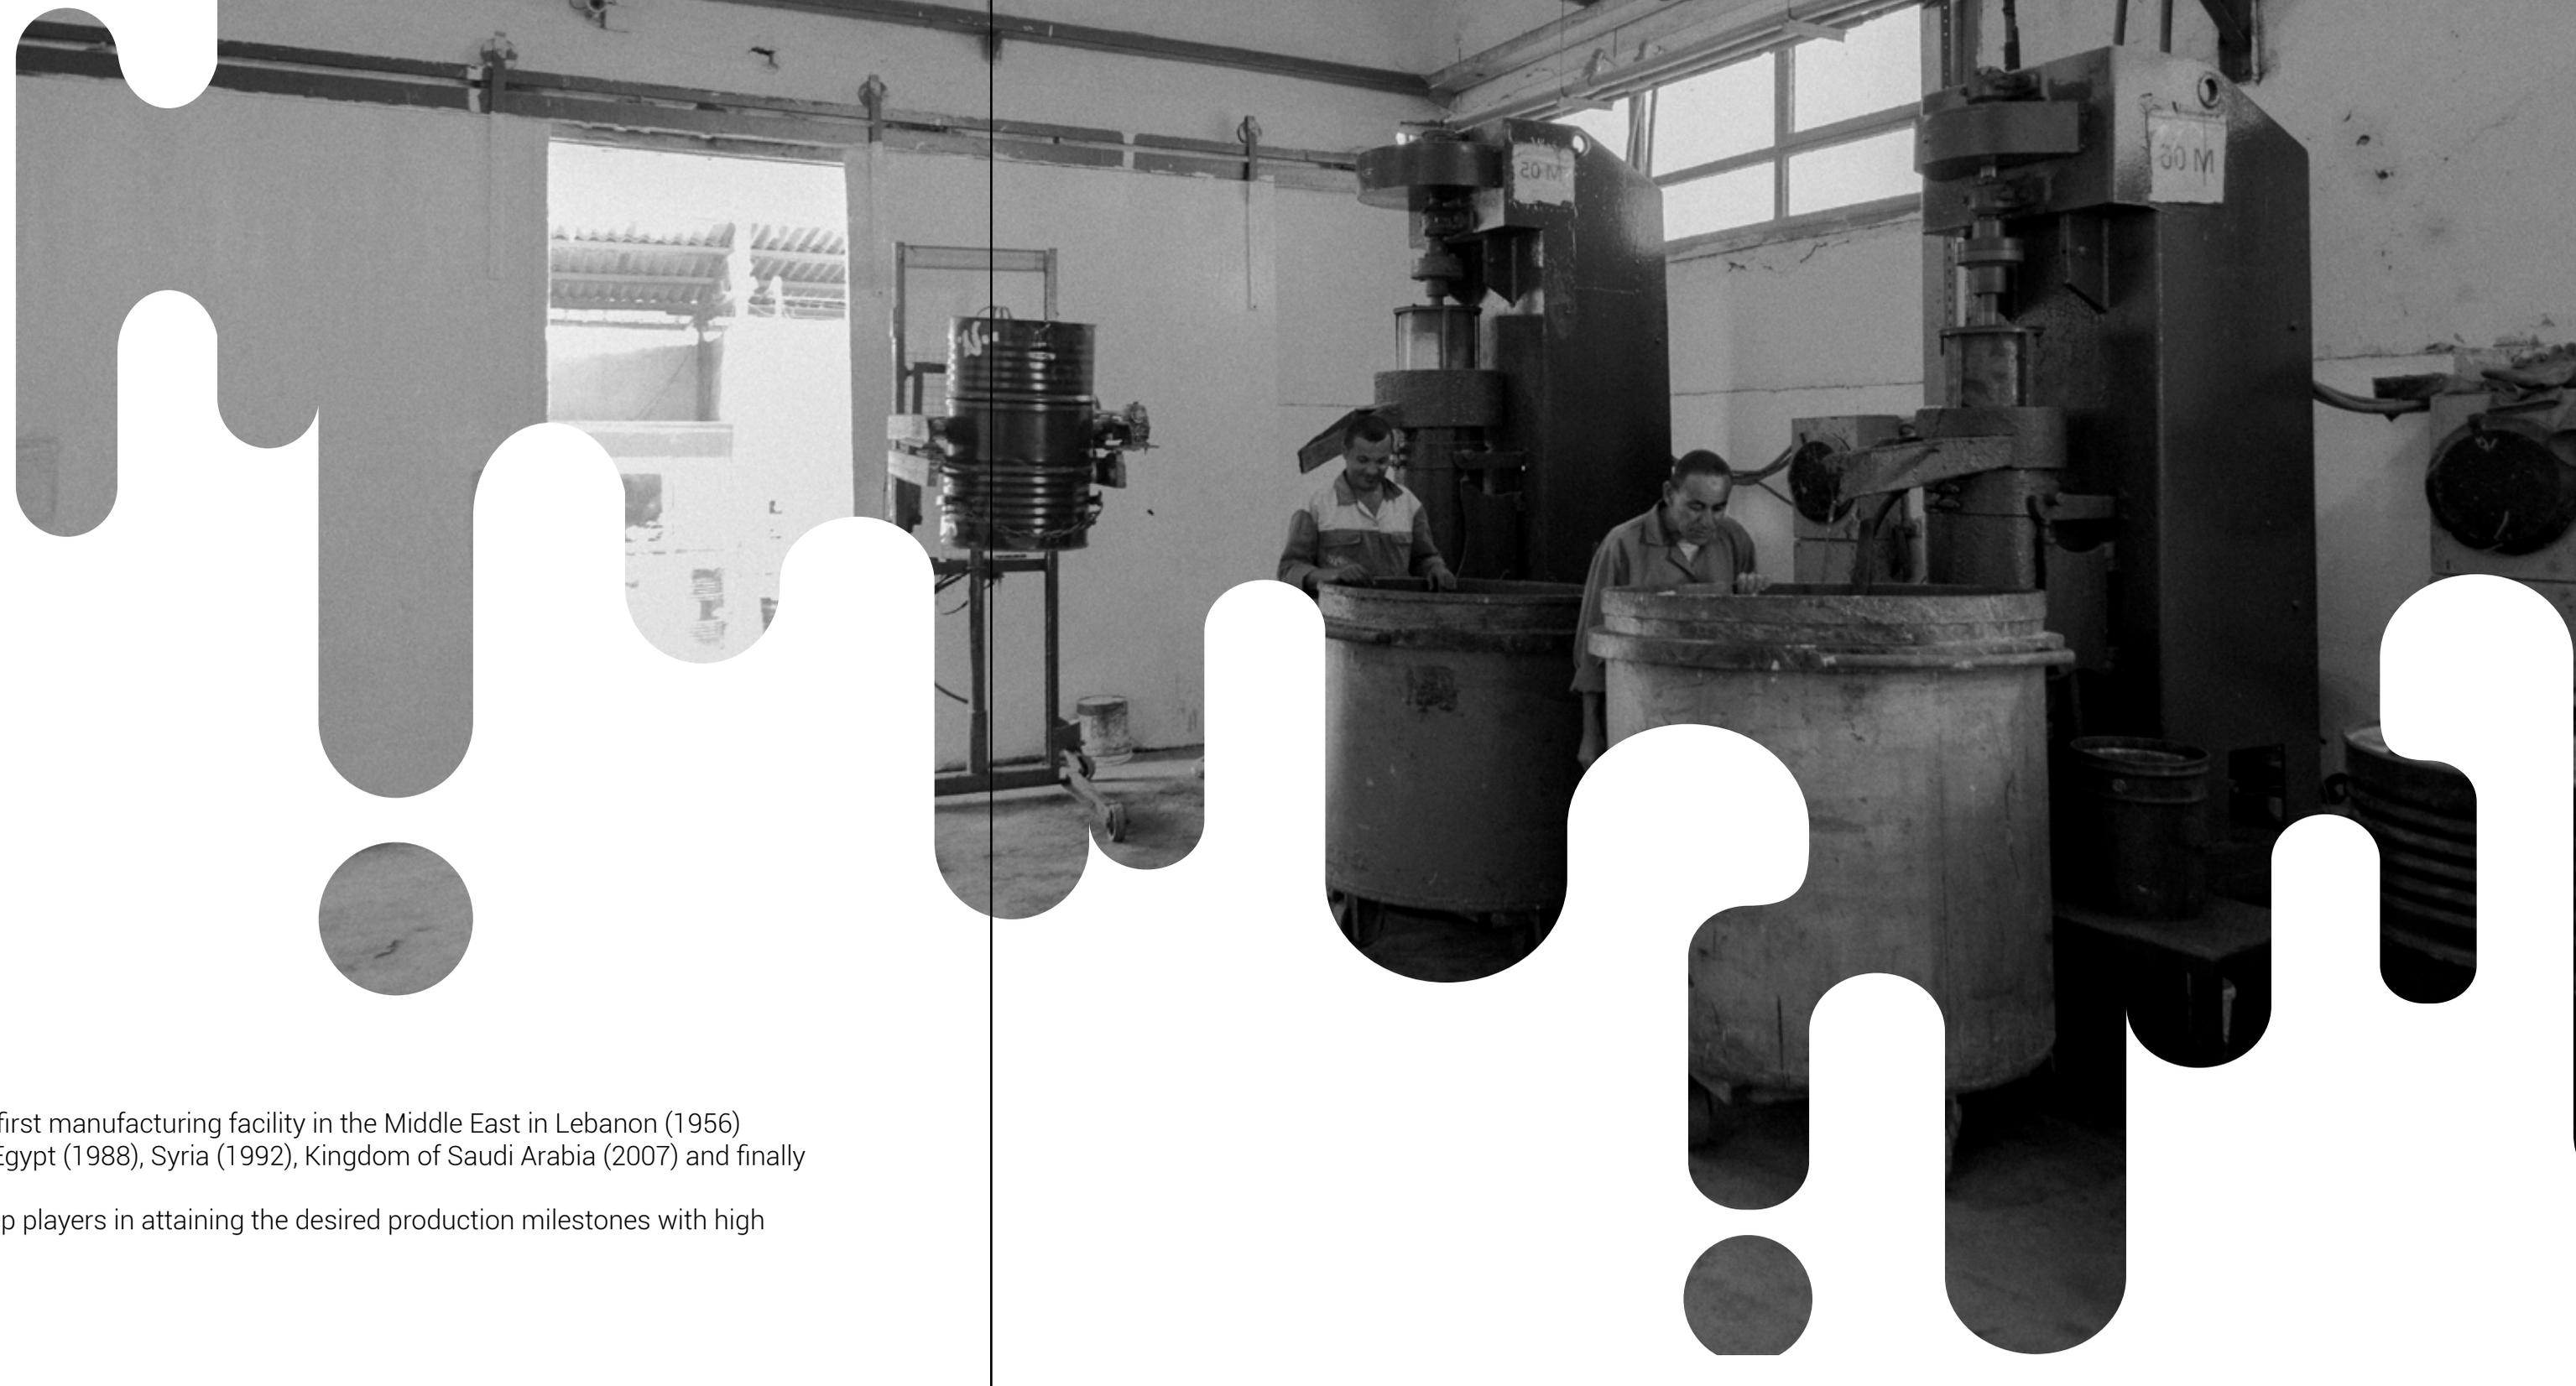

About SIPES

SIPES has become the trademark of quality paints and construction materials in the region, with our expansion and development we were able to acquire the first place on the top of the paint manufacturers in the region, with our expanding Research and Development facilities and continuous personnel-training programs.

History

We started achieving since we built our first manufacturing facility in the Middle East in Lebanon (1956) followed by Iraq (1965), Jordan (1977), Egypt (1988), Syria (1992), Kingdom of Saudi Arabia (2007) and finally Libya (2008).

Since then, Egypt has been one of the top players in attaining the desired production milestones with high quality products.

Manufacturing

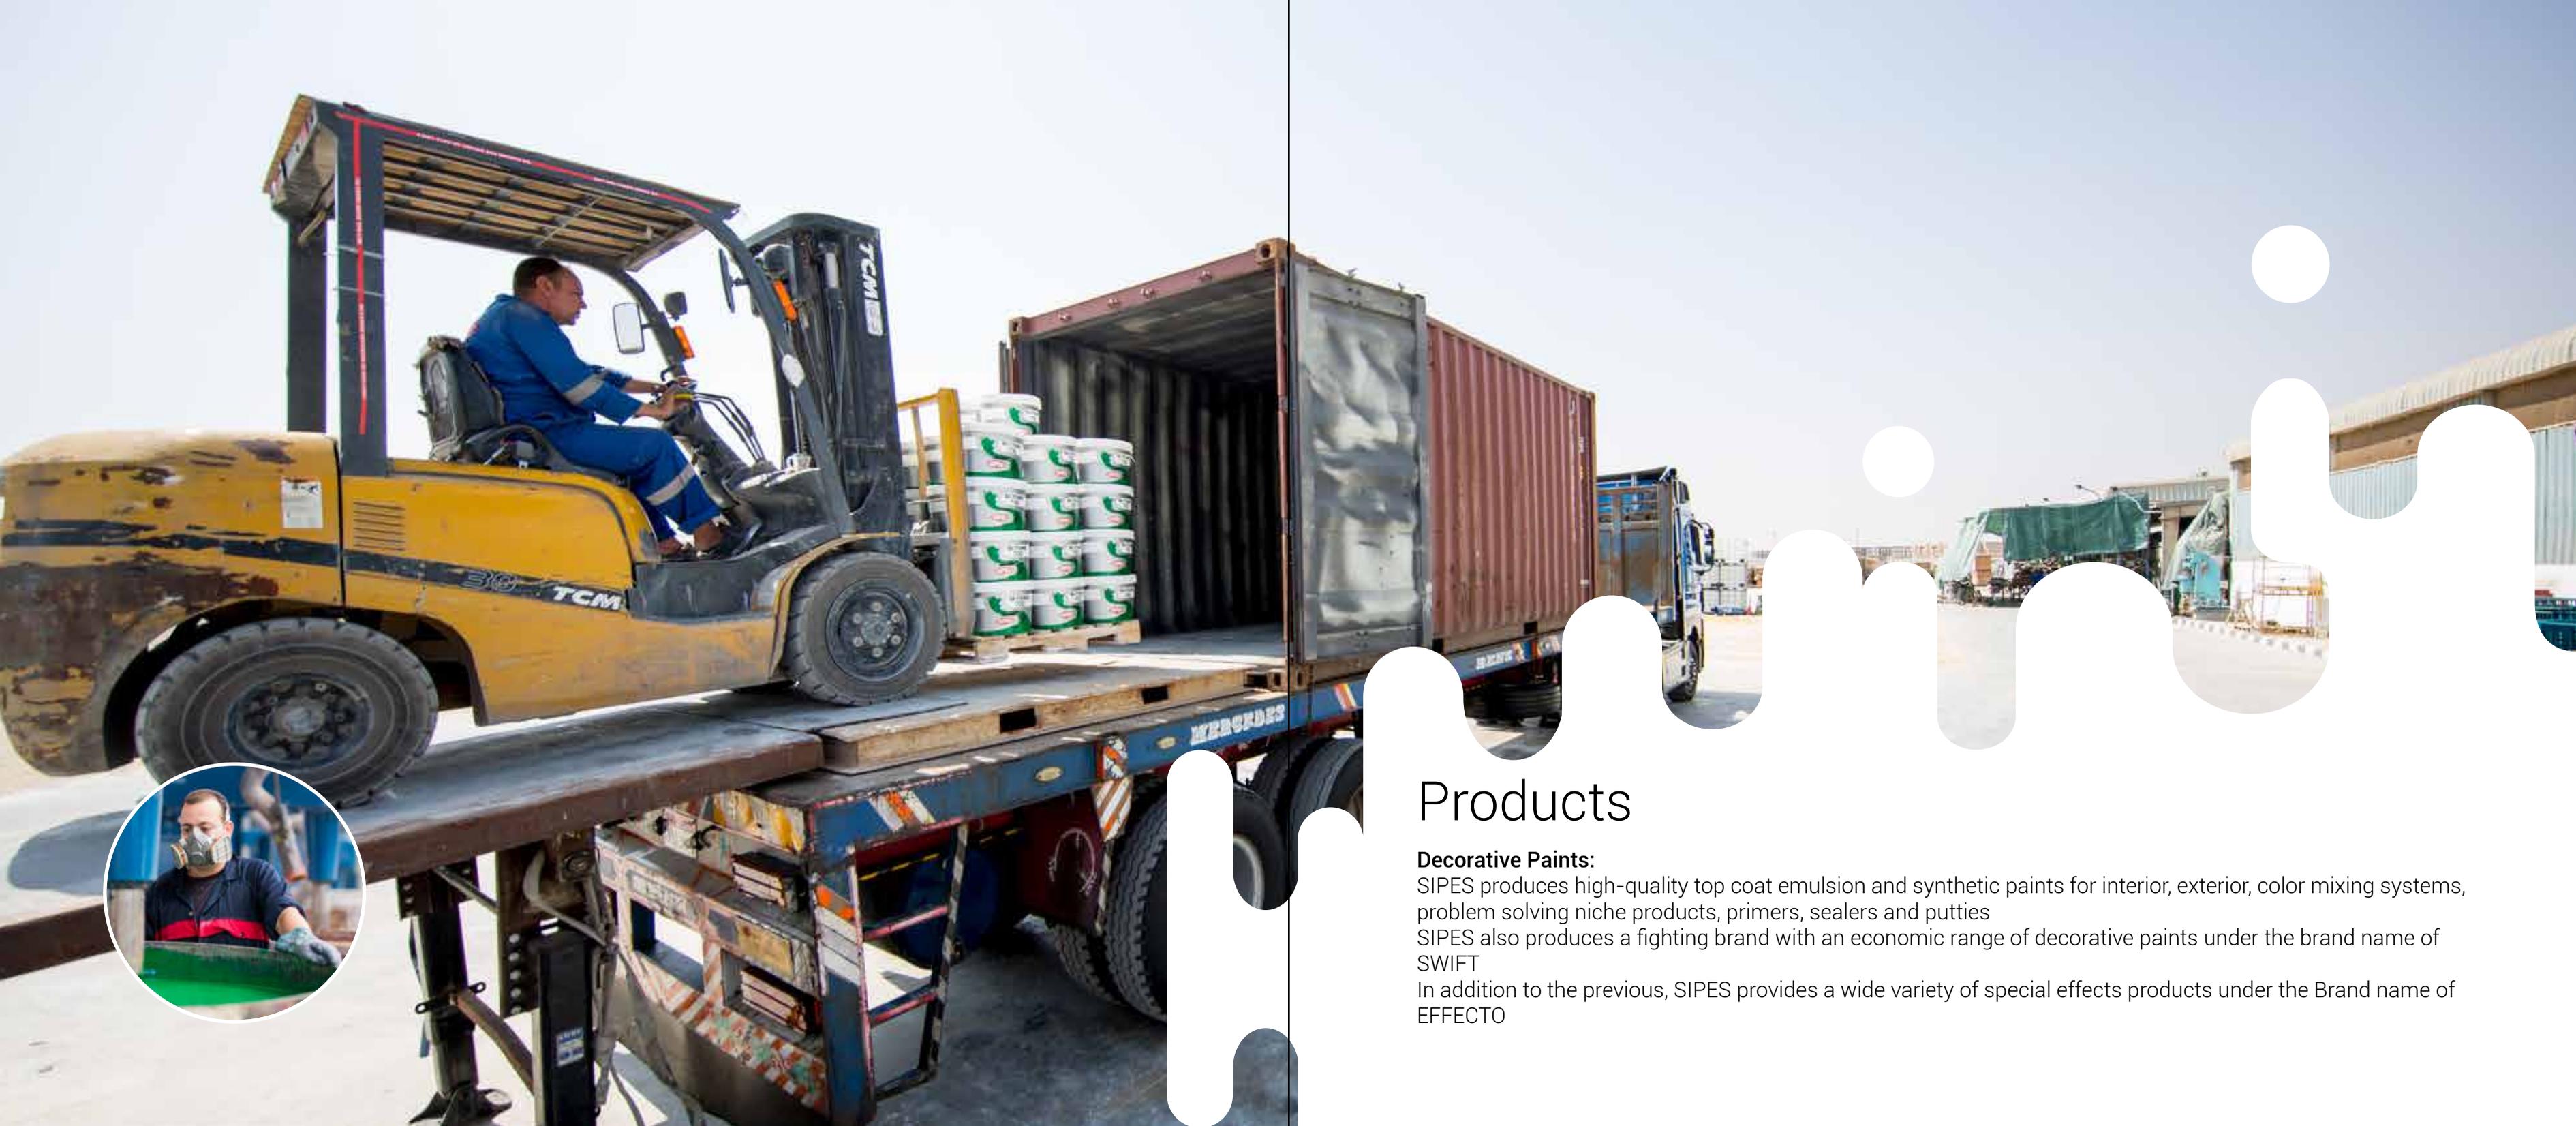

With 3 manufacturing sites built on around 75,000 square meters and 1,100 hardworking and highly trained employees, Sipes proudly provides Egypt and other 15 countries with top quality paint products and up-to-date solutions that satisfy different market needs.

R&D

Continuous development brings lasting confidence. That was the only thing going through our minds when we started creating manufacturing facilities in Egypt, that's why each facility is has its own research and development laboratories which are equipped with the top machinery in the Middle East, also operated by our highly qualified engineers to keep improving and innovating our products with the changing market needs.

Products

Decorative Paints:

SIPES produces high-quality top coat emulsion and synthetic paints for interior, exterior, color mixing systems, problem solving niche products, primers, sealers and putties

SIPES also produces a fighting brand with an economic range of decorative paints under the brand name of SWIFT

In addition to the previous, SIPES provides a wide variety of special effects products under the Brand name of EFFECTO

Products

Wood Paint Systems:

The WOODCARE brand name is one of the strong brands under the umbrella of SIPES, the WOODCARE product range presents a full range for wood coatings which provide different solutions for wood care including wood stains, Sealers, Primers, preservatives, Varnishes and topcoats.

WOODCARE category products:

Polyester – Polyurethane – Nitro cellulose – Synthetic Varnishes – wood stain

SIPES WOODCARE group is looking forward to the continuous development in wood coating.

Products

Car Auto refinishes:

In SIPES we offer the AUTOCARE brand for auto refinishes, our goal is to establish a reputation as the leading provider of car auto refinishes coatings solutions, and create value for our customers by offering products of the highest standard in a manner that is sustainable for the environment.

Our AUTOCARE Coatings, ranging from undercoat to surface to topcoat, are infused with cutting-edge technology to protect vehicles long-term from the rigors of a harsh environment.

Our products in the Automotive Refinish business meet the most exacting standards for rust prevention, longevity and durability.

About PERBUILD

PERBUILD for construction chemicals is one of the most recent operations of SIPES group which has started the production of quality construction chemical materials in 6th of October city. Our quality philosophy springs from the spirit of SIPES group as a mark for quality products coupled with our strong team of technicians devoted for developing and answering the needs of our clients.

History

In 2009, SIPES group decided to expand their market a bit more by producing and developing specialty products for construction chemicals, that's how PERBUILD Co. was founded through overtaking FORSOC factory in Egypt, and in a short time after introducing the market to a top quality products, PerBuild became one of the top manufacturers in the region. The addition of PERBUILD to SIPES group completed our commitment as an integrated group in the building, construction and decoration market.

Manufacturing

Being located in the industrial area in the 6th of October city on 6,000 square meters, PERBUILD model factory city is proud of its highly trained professionals in the field of construction chemicals' industry, working on state-of-the-art technological equipment's to put together the best products that particularly suit the needs of our clients, and the environments in which they operate.

Our factory includes many divisions: Administrative offices, three production wards, labs and a warehouse that join their forces to proudly produce:

1- Cementations:

Three vertical powder mixers with full mixing ability of 2 TN each per batch
Productivity: 60 TN per 8 hour operating shift.

2- Epoxies:

Two mixers with full mixing ability of 1 TN each per batch
Productivity: 5 TN per 8 hour operating shift.

3- Bitumen & Conc. Admixtures:

Three mixers with full mixing ability of 6,000 Lt. each per batch
Productivity: 40 TN per 8 hour operating shift.

Products

Cementitious putty
Gypsum putty
Colored facade rendering
Tile fix
Grout
Cementitious paint
Mortar
Plasters
Colored floor hardener
Bituminous waterproofing coating
Bonding agents & waterproofing additives
Cementitious elasticity paint

Cementitious plug
Epoxy waterproofing paint
Industrial flooring paints
Decorative flooring paints (3D – colored - metallic)
Zinc Rich metal protecting paint
Water tank protective paints
Bonding epoxy paint
Fixing epoxy
Epoxy injection & repair
Self-leveling, slip-resistance flooring

About Transocean

We know where we want to go and this vision drove us to a new level of expansion in the field of marines, as we partnered with Transocean Coatings, the worldwide association of paint producers which has a huge network of manufactures, spread over all the continents, producing a high standard range of coating and operates 45 factories in 40 different countries

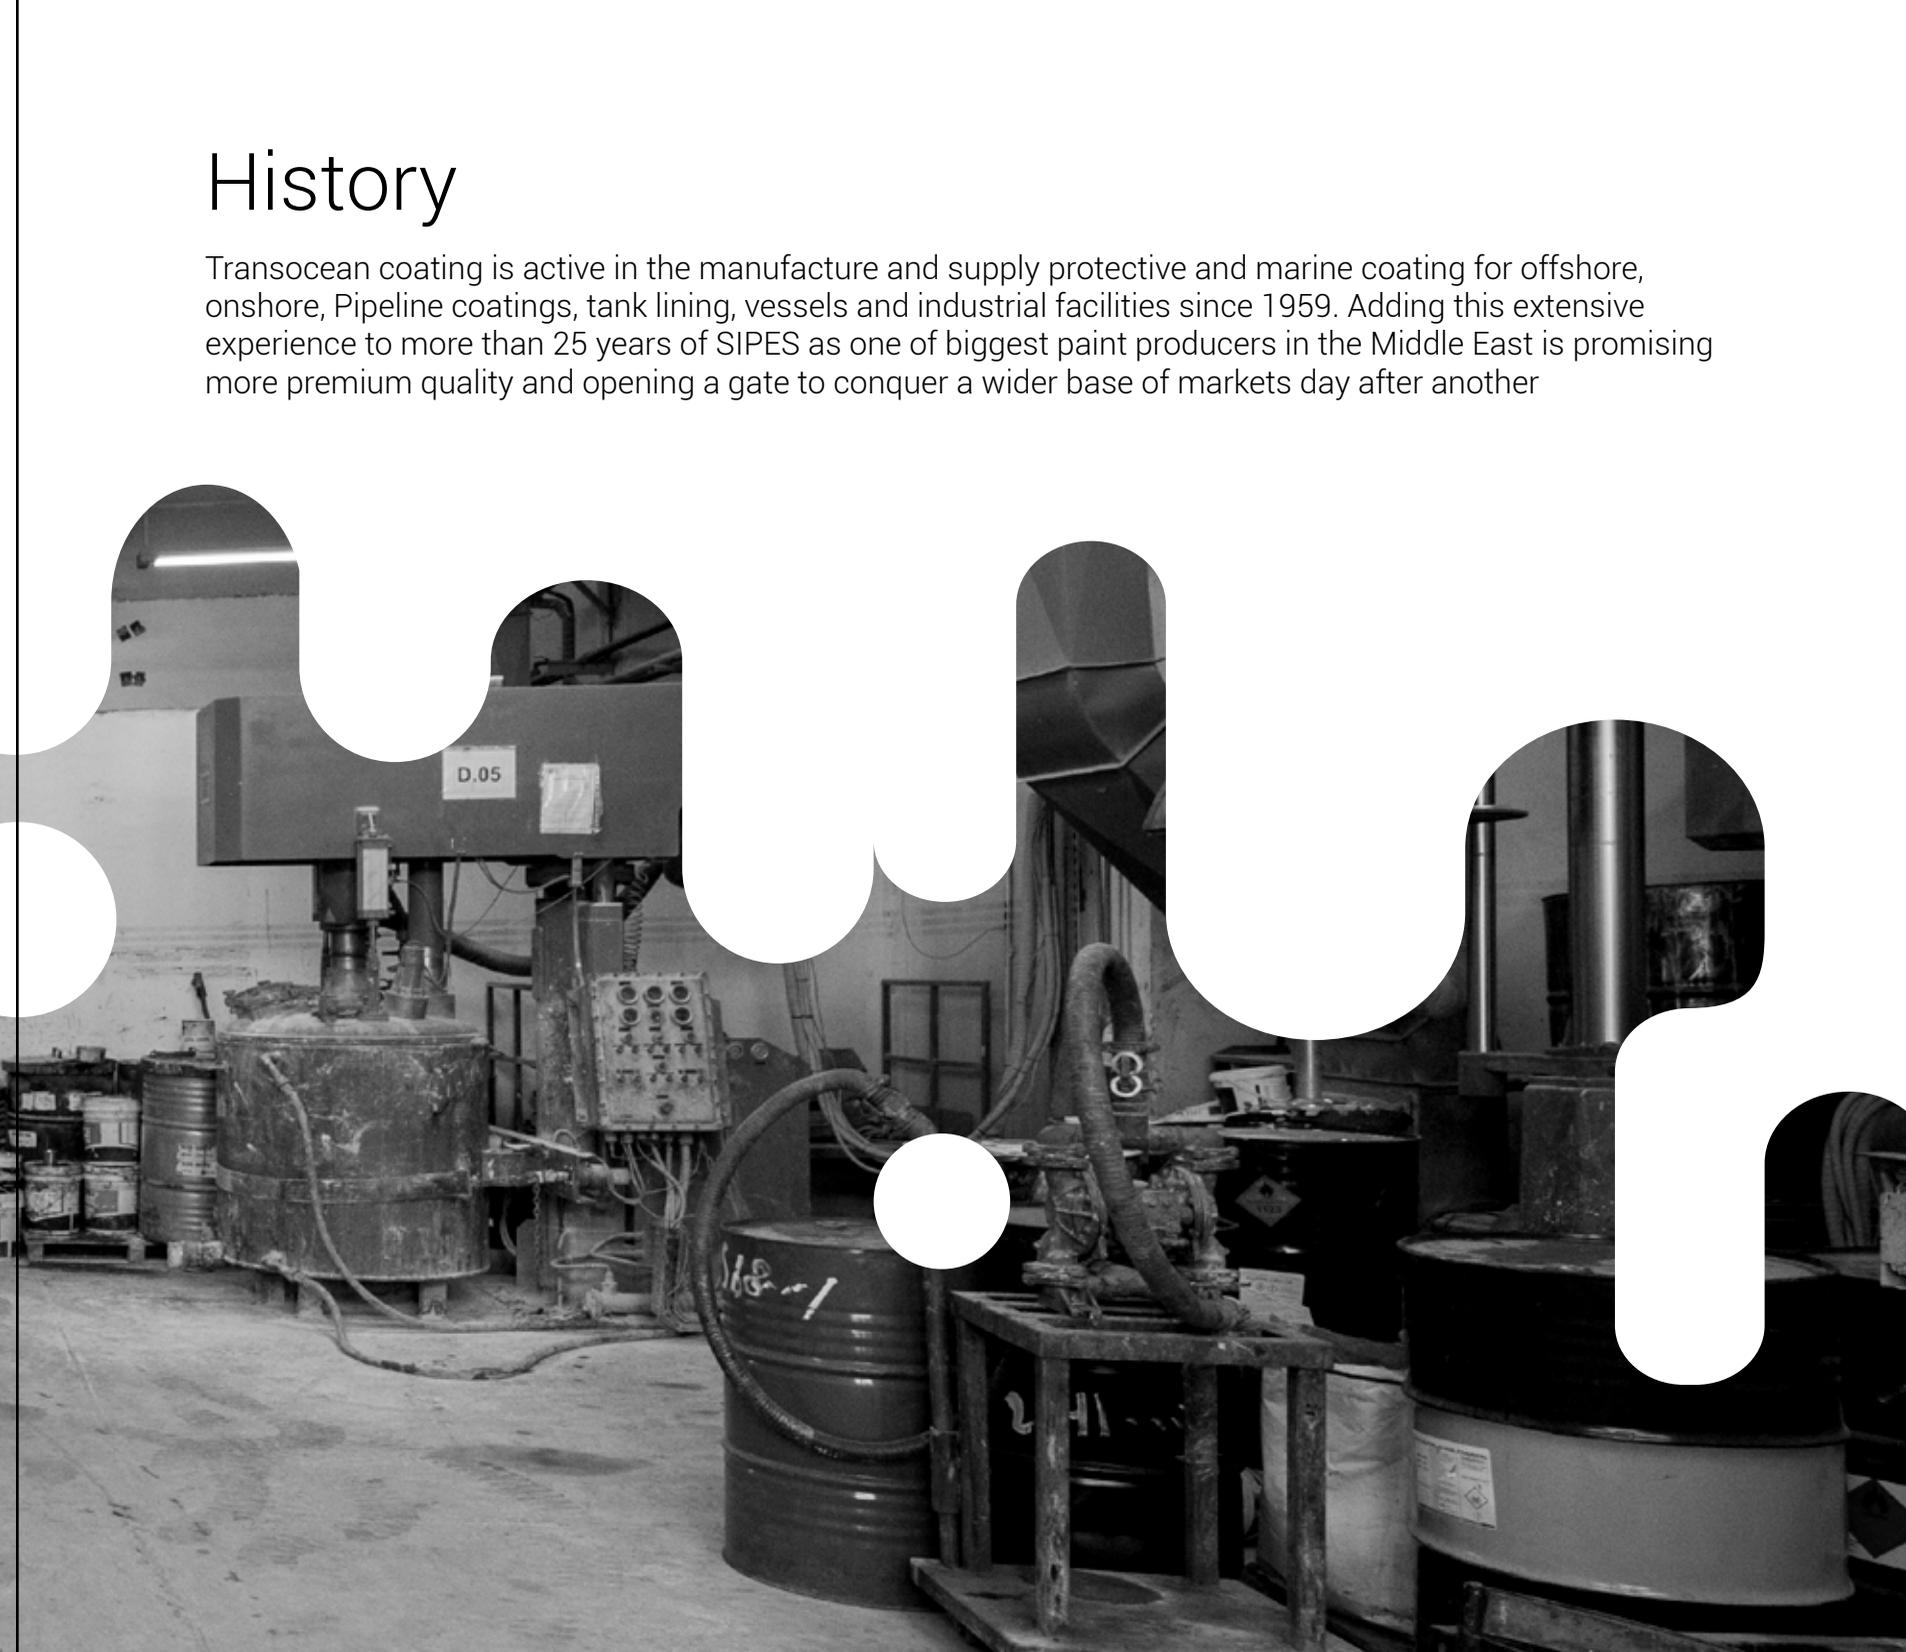

Today, we could proudly create a remarkable impact locally and the region of Middle East in manufacturing and selling antifouling, anticorrosive and many more coatings for ships, offshore installations, industrial facilities and yachts, and bringing this distinguished quality to more and more markets to practically turn our vision into a reality.

History

Transocean coating is active in the manufacture and supply protective and marine coating for offshore, onshore, Pipeline coatings, tank lining, vessels and industrial facilities since 1959. Adding this extensive experience to more than 25 years of SIPES as one of biggest paint producers in the Middle East is promising more premium quality and opening a gate to conquer a wider base of markets day after another

Manufacturing

In Egypt and Libya, Sipes international paints has the exclusive right to manufacture and market Transocean paints. Sipes has got a good reference in Egyptian market, with most of the largest Companies in Egypt in petroleum, marine, infrastructure and electricity fields like Petrojet, PMS, Pipeline Petroleum Company, General Petroleum Company Ras-Gahreb, Ras Sider, Petrobel, Gasco, Towngas, Sumed Petroleum Co, Suez Petroleum Mfg Co, El Nasr Petroleum Co, Petromaint, San Misr Co "EMC", Khalda petroleum Co, Suez Canal Authority, for new constructions & maintenance Projects, Port-said, Suez and Ismailia Ship yards, Temsah ship yard, Alexandria power plant, Suez power plant, And others beside our reference in Market areas of Lebanon, Syria and Nigeria.

Products

The main activities of Transocean Coatings cover below needs:
Offering its member companies technical and marketing knowhow.
Offering the customers of Transocean systems quality paints and unique customer service
Promotion of the Transocean brand, services and products

These activities are concentrated on three product groups:

Marine

Transocean Coatings develops, manufactures and sells antifouling, anticorrosive and many more coatings for ships, offshore installations, and industrial facilities.

Yachting

We offer protection and coating systems to all pleasure crafts that are made out of different materials; metal (steel, aluminum), Wood or Glassfibre Reinforced Polyester (GRP). These coating systems have a decorative function too although for some areas the emphasis is more on the protective component such as antifouling and ballast tanks.

Products

Offshore and Onshore structures

For more than 70 years, Transocean Coatings have been supplying the market with high quality paints combined with an excellent service that provide an excellent protection for the offshore and onshore structures like Platforms, pipes, refinery, storage tanks, Bridges, power plants and so on

Transocean Coatings is able to take up the challenging circumstances of offshore structures especially the splash zone areas face severe corrosive conditions. In some areas of the world, the climate is very unpredictable implicating that in general through surface preparation is not possible and painting work can be interrupted unexpectedly. Getting it right from the start makes very much sense in the oil and gas market since access and window of opportunity is a major obstacle for maintenance painting.

Our quality speaks loud meeting all the standards of Oil companies stated on material protection and selection in terms of paints prequalification standards of 15 years life time and Accelerated cycle corrosion tests like ISO 20340 and Norsok M 501 used by all major oil companies in addition to specific testing on immersion resistance and compatibility with cathodic protection.

About Veeta

VEETA is one prominent extension of Sipes group. It's mainly dedicated to innovative polymer science and plays a significant role in setting up the base of various industries.

VEETA'S portfolio currently boasts four distinct brands each of which has a subset of specialist products. These products lend themselves to a diverse range of applications in a variety of end-use markets. From water repellent latex for the outdoors to adhesives; solvents for tyre- remolds to plastisols for prosthetic limbs – Veeta Egypt has the expertise, technology and capacity to create a compound to suit any purpose promising no less than a world class quality service

History

VEETA Polymer Egypt established since June 2010 as a joint venture between Sipes Group (Egypt) and Vita Liquid polymers (United Kingdom). In October 2014 Sipes Group acquired the share of Vita group and became a 100% owned by Sipes Group.

Manufacturing

Our manufacturing lines are operating around the clock, covering thousands of square meters located in a strategic spot in 10th of Ramadan industrial city. This strategic location enables us to supply factories in the area of different segments with their vital needs.

R&D

At VEETA we strive to innovate to improve on what we already know. This ultimately leads to increased productivity and in return, increased value and turnover. We are constantly engaged in research and development and synergies are achieved through the wider Vita Group. Through this worldwide network, innovations can be rapidly exploited and this too quickly and effectively adds value. At Veeta we pass this added value straight to you.

Products

VEETA introducing its new global brand "POLY-V" which has a diversified portfolio of products that reinforce numerous manufacturing purposes such as:

- Gel Foam for carpet industry
- Pre coat and 2ry Backing (for carpets, and tiles)
- Latex compound for carpet industry
- Grace backing
- polyurethane
- PVC compound for filter manufacturer
- PVC plastisol for molding
- PVC compound for syntactic leather
- PVC compound for carpet and tiles
- EVA and PVA compounds

Warehouses

Our warehouses are widespread all over the country to ease the process of transporting our high quality products to our consumers, and also to the different ports for exportation.

SIPES owns warehouses and sales branches in Cairo, Hurghada, Tanta and Luxor built on around 5,350 meter squares. These warehouses and branches facilitate the distribution of all SIPES products.

PERBUILD Warehouses:

- 1- Factory warehouse:
capacity: 600 TN
area: 500 square meters
- 2- 6th of October City:
capacity: 1,500 TN
area: 1,200 square meters
- 3- Alexandria City:
capacity: 1,300 TN
area: 1,000 square tons

ISO

And Finally...

As the dream of SIPES Group has come to life, this is never the end, it's the beginning of more ambitious dreams and further milestones, we will keep expanding, developing and achieving until SIPES become not only a trademark of quality but also a trademark of success.
