

ABOUT US

"Alzahraa For Export Of Land Products" is one of the Egyptian companies engaged in the field growing and exporting agricultural crops.

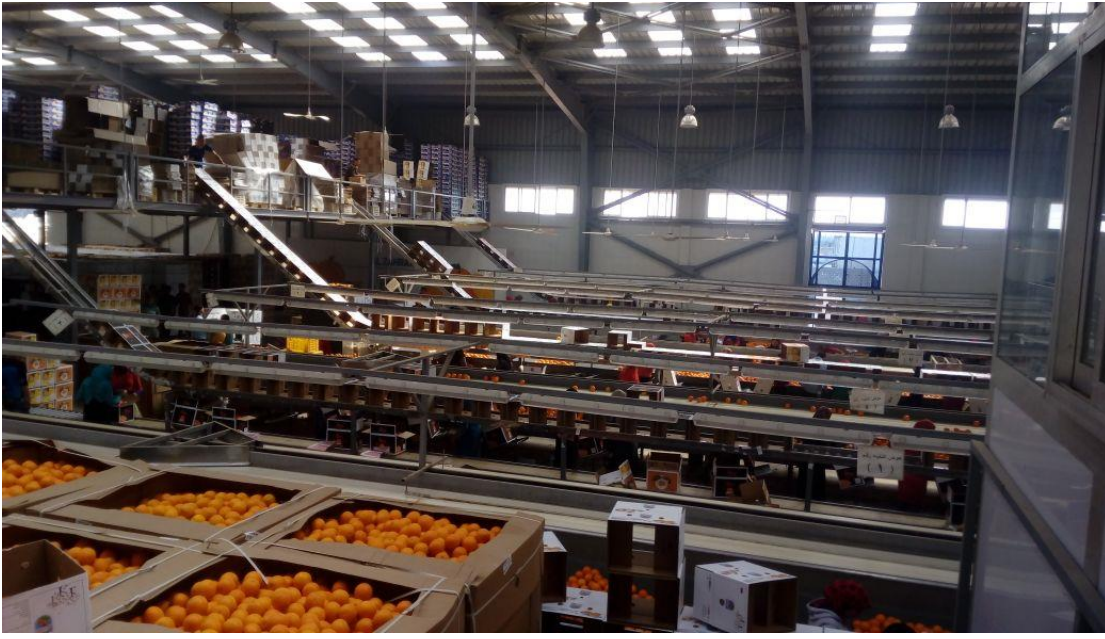

The company is registered with the Chamber of Commerce, and is a member at the Agricultural Export Council.

Since foundation, the company's name "Alzahraa For Export Of Land Products" is in continuous progress and development as the company always seeks to open new markets.

At the export level the company exports a different variety of crops such as: orange, lemon murcott, potatoes, onions, pomegranate, tomatoes, grapes, and Spanish beans for many countries such as Russia, England, Netherlands, Italy, Ukraine, Romania, Belarus, Bangladesh, India, china, emirates, Saudi Arabia, Kuwait, Iraq, Jordan, Oman, Yemen, Iran, Libya, Kenya, and Gabon.

Although the company succeeded in opening markets in the aforementioned markets, it aspires to further success by opening new markets in more countries.

PACKING

The packing process is preceded by the sizing process, which is made by the sizing machine, Sizer, which distributes the fruits according to sizes in its appropriate packing basin.

In order to perform the final packing of the fruits inside the cartons in a way that insures the accuracy and the quality of packing required for the markets.

The cartons are closed mechanically by a sticking machine, which is used to close the carton tightly and to ensure its safe arrival to the customer.

SORTING

Sorting process is done through several stages:

The first stage: broken and damaged fruits are excluded.

The second stage: it comes after washing the fruits using drinking water. At this stage, all physiological and mechanical defects are excluded.

The third stage: It comes after waxing process. In this stage, a checking of all the previously mentioned steps is done. The sorting process is executed by a group of skillful workers highly experienced in the field of sorting agricultural crops.

EXPORTING

"Alzahraa For Export Of Land Products" offers high-quality products from the finest Egyptian agricultural crops. We are ready to export our products to any place in the world, in collaboration with the world's best shipping lines

We grow in our lands the following kinds of oranges

NAVEL ORANGE

It has a protruding part at the end of the fruit, which led it to be renamed in the list of fruits as navel orange. This type of orange is used for the dining table, as it is juicy, and has dark orange color and thick skin that is easy to peel and divide for eating

Description: Large and medium size, seedless and rounded,

Quality: first and second degree,

Sizes: 42-48-56-64-72-80-88-100-113

Season: October till March

Natural color: orange

VALENCIA ORANGE

It is used mainly for juice industry and its second usage is for the dining table. It has a thin skin, and its internal color is light orange. It also has too much juice. This kind of orange is the latest to be harvested. Valencia orange, summer orange, ripens in a late time of the season. Therefore, it exists after the end of the navel orange season.

Description: medium and small size, seedless and rounded,

Quality: first and second degree,

Sizes: 56-64-72-80-88-100-113-125

Season: February till June

Natural color: orange

MURCOTT

Murcott is a citrus fruit that has an orange color and is associated mainly with orange, mandarin orange, because both fruits are from *Citrus reticulata*. Murcott is smaller than orange and easy to peel and divided into cloves. As for taste, its taste is stronger and sweeter than orange.

Murcott is characterized by features such as being strong, slightly soft, heavy in size, and has a gravelling peel without deep holes.

NATIVE ORANGE

It is an Egyptian type of unknown origin. Its full production in Egypt is at the beginning of the citrus season and is considered a good alternative to Valencia orange, summer orange.

It is used mainly in juice industry and is required on a large scale in Western Europe for juice factories.

Description: medium and small size, seeded,

Quality: first and second degree,

Sizes: 56-64-72-80-88-100-113-125

Season: December till February,

Natural color: orange

SWEET ORANGE

This type of sweet oranges contains a high percentage of fructose. It is used mainly for dining table, but it is sometimes used in juice

Description: a small size fruit with seeds and a lot of juice,

Quality: first and second degree,

Sizes: 56-64-72-80-88-100-113-125

Season: December till February,

Natural color: orange
