of conventional & organic
onions & garlic.

www.pharoherb.com

“Just a few words”

Established in 2002, now a market leader specialized in cultivation, selection, packaging and export of conventional and organic onions & garlic.

In Pharaonic Bioherb a word is still a word of value, Once given, it is committing without ifs and buts.

We consider applying the most advanced automated production, handling and quality

management techniques. All procedures at the farms and pack house levels are running

in accordance with GlobalGap, Iso 22000, Tesco Nurture Choice Standards & SEDEX, BSCI socio-

environmental standards & we are EC 834/2007 certified for organic production.

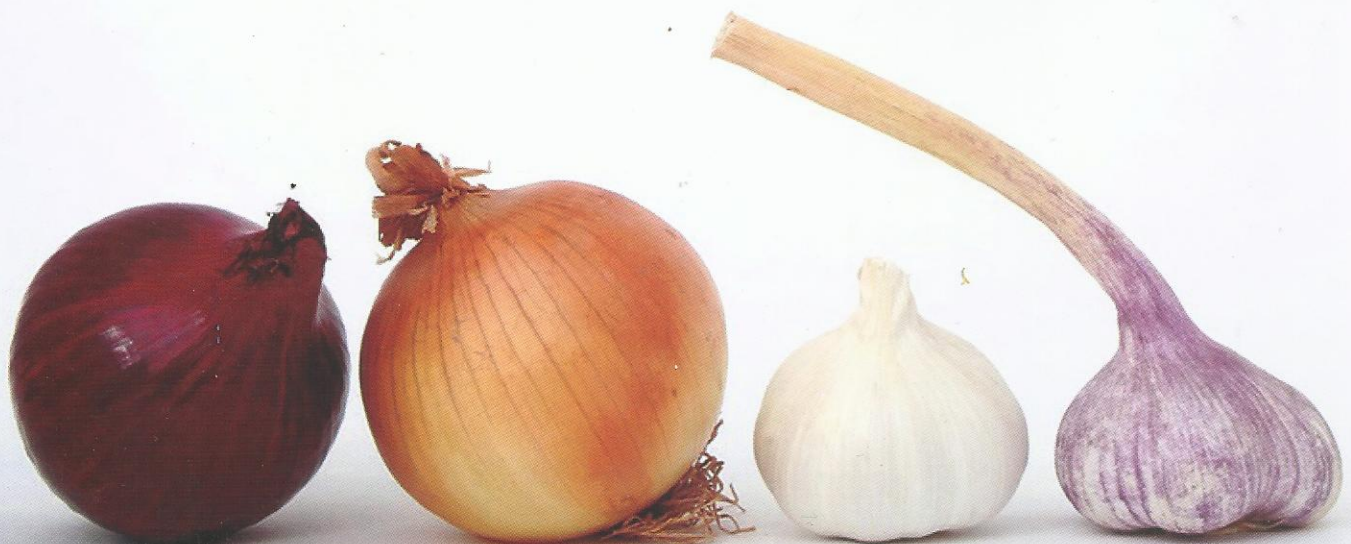

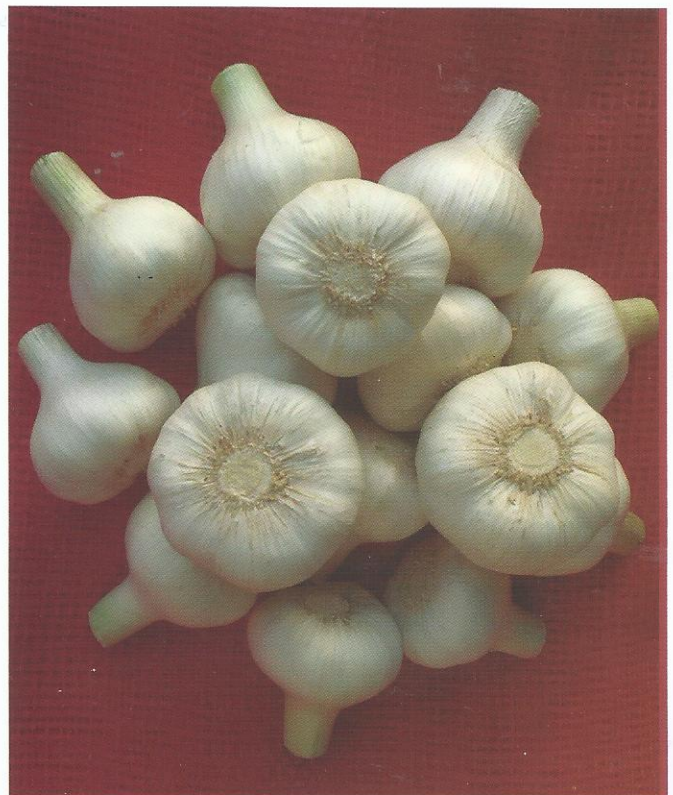

Our package deal

Who knows us is well informed; Pharaonic Bioherb is your contact no.1 with regard to cultivation and marketing of quality onions and garlic.

As producer; cultivation from over 300 hectares is secured in collaboration with the Development Association of Small Organic Growers. Storage and export capacity exceeds 15000 tons per year.

Through a fully controlled short supply chain & mechanized sorting and packaging; we produce & market premium quality conventional, organic Yellow Onions, Red Onions, White Garlic, Purple Garlic & fresh garlic between February and July every year. Each type of produce offered to consumers can be fully traced back to its source for maximum safety & quality.

Pharaonic Bioherb Staff

Staff has more than 15 years experience of exporting worldwide; observing all the necessary regulations and procedures through integrated methods. Exports travel to Germany, Holland, England, Austria, Poland, India, Asia, Africa and Saudi Arabia markets.

The indispensable classics in tasty cuisine
