ELCHARK
THE CHAIR FACTORY

PRODUCT
BROCHURE
2016

There will come a time when there will be few products left that arise exclusively from a responsible approach in dealing with raw materials, that are extremely durable, and that adapt themselves superbly to the people who use them. That is exactly what places MEUBLE EL CHARK in a leading position in chair manufacturing. This was and always will be our philosophy.

SINCE 1944

MEUBLE EL CHARK was founded in 1944 by the brothers Zaki and Helmy Abdel Hady as an artisan enterprise to manufacture wooden products in Gezirett Badran, followed by the famous Chair Factory in Imbaba (Korsy Helal El Chark and Ablakaj Imbaba). The firm which has always been managed by the family, preserves a great artisan background. This is highlighted by the possibility of resolving the most varied technical problems involved with the details of design and manufacturing, all of which enabled us to enhance the quality of our products and better serve our customers by exceeding all expectations. If over 70 years of successfully operating and producing chairs is any indication, we can confidently boast our pursuit of excellence, and our ultimately long term vision. The success of our firm and its acclaimed history of high quality productivity owe much to the commitments of its leadership to the growth and development of its strategies. If that proves anything, it assures our dedication to present the finest high quality product with the best service we can provide. For us, we see that chairing the wood is not just a profession but a FAMILY TREASURE.

DESIGN APPROACH

Our years of experience have allowed us to grow into a company that has provided quality products to a wide range of companies, restaurants, hotel chains, entertainment spots, cruise liners, schools, theaters, conference centers, resorts and hospitals. We have grown from a handful of skilled workers to a family of over 300 members who take great pride in being capable of producing up to 250 different designs concurrently whilst maintaining an average of 150 chairs per day on a total area of 20,000sq.m., truly showing what

one big family can do.

Design and fashion trends play a major role in the production and the development of our line of products. The production process of chairs has never been solely the bending, cutting and shaping of wood, once all the needed parts for the items are collected we will begin the scrupulous process of perfecting all the angles, shapes and joints that go into the products. Making them more than just a seat with a back but a complete structure in its simplest outlook.

MEUBLE EL CHARK LAB

We are proud of our wood bending capabilities and we consider them one of our trademarks. Depending on the model of the chair, we will put to use the facilities using either the high frequency presses and/or our traditional steam bending techniques. With these technologies, we are able to be innovative in the designs we provide and gain a higher yield as compared to more traditional methods. In the end, we are able to provide you with long lasting and cost competitive products while being environmentally conscientious.
