

DP2000

LARGE CHARACTER PRINTER

- DP2000 Printer is designed and manufactured as a new economic model of industrial large character inkjet printer. It could be run stably, and have anti-interference ability strongly.
- DP2000 machines are refined in sealing performance, come with the air source, especially suitable for on-site poor environment, heavy dust occasions.
- The DP2000 Large Character DOD coding and marking systems for texts, dates or logos are available in printing heights up to 50 mm for each print head. For larger printings several print heads can be combined.
- The resolution meets the requirements of all industrial applications for marking and coding. These large character systems, with 7-, 16- or 32-nozzles print heads are easy to use.
- DP2000 printers are also suitable for use on fast conveyor belts.

TECHNICAL SPECIFICATIOIS

Display	8 inches Touch Color LCD with back li
User-interface	Simple and easy-to-use operating system
Input device	Touch Screen, and Ethernet Interface
Data interface	OTG port, and Ethernet port
LCD indicator	Alarm, ink low, print, run, and counter
Operating temperature	15o C – 45oC
Mounting Orientation	Horizontal or downside (Multiple direction)

DP2000

LARGE CHARACTER PRINTER

Electrical requirements	AC 100V ~ 240V, 50/60Hz
Data Cable	Standard length 3m (others customized)
Photocell	External sensor provide more reliable
Print distance	5-30 mm recommended print distance.
Ink	MEK, Propanol, and Water-base.
Font size	5x5, 5x7 , and 10x16
	FEATURES
Printability	Text, Image, lot box code, Counter, Date/time, Expiry Date, Julian Date, Shift code.
Print height	Up to 4 lines (26mm/line {7dots}) or 2 Lines (60mm/line { 16dots})
Dot size	Adjustable to give good print quality.
Print Speed	Speed (0.1-200 m/min)
Available language	Arabic, English, Spanish, Portuguese, Russian, Turkish, and Chinese
Encoder	Provide high print quality on variable conveyor speed.
BCD	Provide selecting printing messages
